Monge®

Natural Superpremium

The pet food that tells it like it is

MONGE, THE ITALIAN PET FOOD FAMILY SINCE 1963.

Monge was born in 1963 when Baldassarre Monge understood the importance of offering our pets a complete and balanced diet to meet their nutritional needs.
Then, as now, the Monge family is engaged to ensure the highest product quality and safety for the well-being of our four-legged friends.
Meeting the nutritional needs of our animals does not only mean to keep them fit and healthy: it means much more!
Cuddling with them, spending time together and seeing them grow; the most important thing is what we give them: our love.

Trust us, trust the love we have for them!"

Baldassarre Monge

A CUTTING-EDGE COMPANY MADE IN ITALY

MONGE IS THE MOST IMPORTANT ITALIAN MANUFACTURER OF PET FOOD FOR CATS AND DOGS.

The headquarters in Monasterolo di Savigliano, in the province of Cuneo, house all departments: production, analysis, quality, R&D, logistics, marketing and management.The strategic vision of the Monge Family and the commitment of all its employees guarantee the highest quality of all products.
The most innovative dry food plant in Europe, state-of-the-art production and packaging lines and an automatic warehouse ensure the best technology in the production process.
The company devotes time and resources in finding innovative, natural and cruelty-free solutions for the development of its products, formulated to support the well-being of our dogs and cats.
The internal R&D department develops the formulations of the recipes to obtain healthy, balanced and complete foods for cats and dogs.Monge selects the best ingredients in order to develop products which provide all essential nutrients. The result is an ideal diet for the daily well-being of our four-legged friends.

INNOVATIVE TECHNOLOGIES AND BIG NUMBERS

MONGE THINKS GREEN

OUR COMMITMENT TO ENVIRONMENTAL SUSTAINABILITY

We promote policies aimed at developing a sustainable economy. We produce our own empty cans, which, like the trays, can be recycled indefinitely. 80% of the energy we consume is self-generated thanks to solar panels installed on the roofs of the plant, a cogenerator and a turbine. The heating of our production plant is self-generated by reusing warm water utilized in the production phases. More than 90% of the waste produced in our plant can be recycled. Monge's logistics fleet distributes our products over short and medium distances and consists of ecologically advanced vehicles, including those powered by liquefied natural gas. For us, the love for animals goes hand in hand with environmental protection.

Monge Natural Superpremium

Monge Natural Superpremium is the result of 60 years' solid experience feeding our little furry friends. It offers not only tasty, nutritious recipes but also complete balanced diets for the wellbeing of each and every age and size of animal. Each formulation is developed taking into account an animal's ideal body weight, age, activity and lifestyle. All recipes are the result of Made in Italy research and a constant exchange of views with breeders, consumers and nutritionists in order to achieve a tasty balanced product. Protein sources carefully selected for their nutritional value, together with fats, vitamins and minerals, come together to create the basic nutrients for each recipe. The strength of Monge Superpremium lies in its animal protein source as first ingredient, together with the carbohydrate sources, and all made highly digestible through the extrusion process. Recipes include fresh meat.

The cat line offers products for specific ages and nutritional requirements:

DAILY LINE

- KITTEN
- ADULT
- SENIOR
- INDOOR
- HAIRBALL
- STERILISED
- URINARY

MONOPROTEIN LINE

- ADULT SALMON
- STERILISED TROUT
- STERILISED DUCK
- STERILISED BEEF
- STERILISED CODFISH

SPECIALITY LINE

- ADULT LIGHT TURKEY

AMONG THE NUTRITIONAL CHARACTERISTICS:

Xylooligosaccharides (XOS) are next-generation prebiotics, i.e. non-digestible carbohydrates capable of reaching the colon, thereby promoting the growth and activity of beneficial microbial intestinal flora. XOS withstand gastric acidity and enzymes in the gastrointestinal tract. They are not absorbed but are fermented by intestinal microorganisms and selectively promote growth of the intestinal flora to support the immune system.

ANIMAL PROTEIN SOURCE 1° INGREDIENT

HIGHLY-DIGESTIBLE PROTEIN SOURCES SELECTED FOR THEIR NUTRITIONAL VALUES
